

“I’ve seen a great improvement in productivity in our field techs, Comet Tracker has allowed us to save enough money to hire an additional tech in the field.”

- Scott Butler, Operations Manager for Williams Electric

## Williams Electric Co.

Security system installers located in Ft. Walton Beach, Fla.

### PROFILE

Williams Electric Co. headquartered in Ft. Walton Beach, FL, installs security systems around the country. They specialize in setting up closed circuit TVs for security systems.

### CHALLENGES

Williams Electric needed a simple way to centralize its operation. With an office in Florida and service locations across the country, there was a need to have a way to track technicians in the field. They also needed a way to keep workers accountable for accurate timekeeping.

### SOLUTION

Comet Tracker provides Electric needed. The tracking features within Comet Tracker brought a powerful GPS solution so management could keep an eye on the entire workforce at once. Since Comet Fleet is a mobile solution that is easily loaded on to mobile devices, there was no issue integrating the software onto technicians’ devices.

The timekeeping features within Comet Tracker make it simple for employees to clock in and out. Technicians in the field can clock in from their devices and management doesn’t have to deal with paper timesheets any more.

### BENEFITS

Comet Tracker has saved time and money, and has increased accountability for workers away from the office for Williams Electric. Knowing that their actions are tracked by GPS, technicians don’t waste any time getting to jobs or spending unnecessary time on the clock.

“I’ve seen a great improvement in productivity in our field techs, Comet Tracker has allowed us to save enough money to hire an additional tech in the field.”
