

Professional Service

Boost Accountability and Organization With Encore

Quickly locate employees, examine their workloads, and coordinate that information with any outstanding jobs you have left for completion.

Encore for the Professional Services Industry

Wireless Forms - Improve documentation and the flow of information from the field to the office.

Dispatching - Notify workers of job assignments or updates. Coordinate drivers for multiple deliveries to ensure everything arrives on time.

Improve customer service - Ensure customer satisfaction by providing clarity and reliability regarding deliveries.

Improve communication - Instantly relay directives between workers and administrators, regardless of location. Organize delivery information through secure back-end software and send it directly to your drivers' handsets.

GPS tracking - Quickly locate vehicles, assets, and workers. Validate routes and miles driven with GPS tracking. Full map visibility provides vehicle locations, directions, and speeds to promote fleet visibility.

Timekeeping - Increase accountability with date- and location-stamped time punches that can verify employee actions. Supervisors can seamlessly account for entire crews.

Reduce fuel costs - Idle and stopped alerts monitor how long engines run in fleet vehicles. Pairing that with aggressive driving and speed alerts can help determine if drivers are burning through gas by operating vehicles irresponsibly.
