Public Sector

Respond to Emergencies More Effectively With Encore

Maximize the utility of every available resource. Improve personnel and fleet utilization, curb expenses, and monitor profits to keep everything running smoothly.

Encore for the Public Sector Industry

Wireless forms - Keep all payouts and expenses organized to maintain public confidence and create trust. Forms create a detailed paper trail, showing exactly where funding goes.

Dispatching - Respond to emergencies more effectively by assigning jobs to employees who are closest to specified locations. In the public sector industry, every second counts.

Improve communication - Instantly relay messages to workers operating away from the office. Receive updates and inform public sector professionals as various needs arise.

GPS tracking - Quickly locate vehicles, assets, and employees in the field. Validate routes and miles driven with GPS tracking. Full map visibility provides vehicle locations, directions, and speeds to promote fleet visibility.

Reduce fuel costs - Idle and stopped alerts monitor how long engines run in fleet vehicles. Pairing that with aggressive driving and speed alerts can help determine if drivers are burning through gas by operating vehicles irresponsibly.

Timekeeping - Eliminate early, extended, or unapproved breaks to maximize productivity. Only pay for time spent working by tracking how long employees are on the clock, down to the second. Improve accountability by examining what happens on company time.
