

Transportation

Optimize the Productivity of Your Fleet

Know where fleet vehicles are, where they are heading, and when they will reach their destinations. Monitor driver behaviors and patterns to promote responsible vehicle operation.

Encore for the Transportation Industry

Improve communication - Instantly relay directives between drivers and administrators, regardless of location. Road conditions frequently change; keep everyone on the same page.

Safety is a priority - With pre-and post-inspection reports, panic buttons, and hard braking/speeding alerts, Encore makes it possible safeguard your workforce as they travel.

Dispatching - Quickly adjust routes if need be. Should breakdowns or other hazards occur, utilize Encore to dispatch your white fleet. Coordinate drivers who have multiple deliveries to ensure everything arrives on time.

Alerts - Speed, idle, and stop alerts can show how drivers operate your fleet vehicles, making it easier for you to note positive or negative trends.

Historical data - Breadcrumb trails can also ensure drivers are going to approved locations.

Reduce fuel costs - Alerts can monitor how long fleet vehicle engines spend running. Pairing that with aggressive driving and speed alerts can help determine if drivers are burning through gas by operating vehicles irresponsibly.
