Education
School District

A county school district responsible for the transportation of 109,000 students daily.

CHALLENGES

A school district's bus drivers logged 65,000 miles per day, transporting thousands of students to and from school. In the past, dispatchers communicated with drivers via push-to-talk solutions. When its wireless provider eliminated the 2G network that supported push-to-talk, the district needed to find a solution that would keep students and drivers safe. Officials also wanted a mobile resource management platform that could track buses in near real-time and give drivers the convenience of clocking in and out through mobile devices.

SOLUTION

The district chose Mobile Workforce Plus to better communicate with its drivers from virtually anywhere, but also because of its GPS Tracking tool, which helped them better manage their

mobile resources. With our software, drivers also gained the convenience of clocking in on their mobile devices, improving timesheet accuracy and workforce productivity at the same time.

BENEFITS

Our solution helps the district determine the best bus routes and locations for its many designated bus stops. Its ability to show traffic patterns also helps administrators determine the best overall routes for a specific area to get students to and from school (from both a fuel and time standpoint). MWP also helps the district with payroll tasks. Drivers use smartphones installed into each bus to log in and out at the beginning and end of each shift, with data integrating directly into the district's financial system. Events and alerts on violations such as speeding are also recorded, with improved communication and safety being the biggest benefits.

INTRA-COMPANY MESSAGING

Faster, more reliable communication between drivers and officials.

GPS TRACKING

Reduced fuel costs, more efficient routes, and greater safety.

MOBILE TIMEKEEPING

Saved time and money via integration and added convenience.
