Dynamic Lists

Dynamic Lists can help your organization become more efficient, versatile, and detailed in the ways you manage your data by helping to limit errors.

Dynamic Lists with TeamWherx™ allows you to filter through your data by changing text fields based on previous selections. Use them to easily search for pieces of information based on the text field category of your choosing and gain new tools to effectively manage your data.

Expense Form

Expense Details:

*Expense Type
Fuel

*Expense Amount
$53.46

Comments

*Business or Personal?
◉ Business
○ Personal

Faster Data
Find the information you're looking for quicker by automatically sifting through your data via specific categories.

Connect Externally
Link outside data sources to your existing digital forms for greater integration capabilities and ease of use.

Filtering Methods
Sort your data by a variety different groups, including location, hourly rate, products, or other custom text fields.
