

Fleet Management

Key Features

- A user-friendly live view shows every vehicle and its current status.
- The customizable dashboard displays total fleet summaries.
- On-demand fleet reports are available for:
 - Fleet utilization
 - Event details
 - Alerts
 - Geofence history
 - Idling
 - And more
- View key performance metrics with Vehicle Scorecards.
- Monitor frequented work areas with user-drawn Geofences.
- See near real-time road congestion patterns with Traffic Overlay.
- Get alerts for various settings and actions, including:
 - Excessive idling
 - Speeding
 - Hard braking
 - Quick accelerations
 - Geofence in/out
 - Vehicle events (Check engine light and ignition status)

With TeamWherx™, track relevant data about your fleet's operations, such as location details, instances of excessive idling, harmful driving behaviors, and any after-hours movements.

Maintaining constant awareness of your vehicles' positions in near real-time helps you strategically increase fuel efficiency and vehicle lifespans, as well as implement a strong level of security over your fleet.

Key Benefits

- Monitor, analyze, and coordinate every aspect of your fleet.
- Easily evaluate company driver performances.
- Proactively reduce harmful vehicle usage, like speeding or aggressive driving.
- Limit the time your vehicles spend idling to reduce fuel consumption.
- Eliminate instances of company vehicles being used outside of specified work hours.
- Send jobs to employees who can arrive faster and increase customer satisfaction.
- Increase the chances of recovering missing or stolen vehicles.
