

Public Wireless Forms

Struggling to connect with your customers in a way that makes life easier for you both? With Public Wireless Forms, give them direct access to your business so they can request service without needing to speak with a person. Just provide them with a public link and — with no login required — they can access a pre-built Wireless Form and provide the information needed to dispatch the work order. Collecting vital information beforehand expedites the process and lets workers fit even more jobs into their days.

The screenshot shows a 'Service Request Form' interface. At the top, it displays 'Form start: 10/16/2020 4:57 PM' and 'Form submit: 10/16/2020 4:57 PM'. Below that is the location: '1105 W Woodlawn Ave Tampa, Florida, 33603'. The form is titled 'Service Details' and shows a count of 1. The form fields include: 'Service Type' (Tree stump removal), 'Residential or Commercial?' (Residential), 'Comments', 'Additional Services Required?' (YES), 'Describe Additional Project:', and 'Signature'. At the bottom, there is a 'Send Copy to' field and a row of buttons: 'Delete link', 'https://mobileworkforceplus', 'Copy', 'Reviewed' (with a toggle switch), 'Print preview', and 'Edit'.

Key Benefits

Data can be collected by third parties, regardless of whether they are TeamWherx™ users.

- Expedite job orders by letting customers provide essential work order details ahead of scheduled visits, allowing your team to immediately begin working upon arrival.

Expedite Jobs

Collect customer information prior to job-site arrival.

Maximize Resources

Use company websites for customer requests.

Account Linkage

Form data automatically feeds into account.

After-Hours Orders

Receive service requests any time of day.
