

# HOW MOBILE PAYMENTS WORK

Powered by Stripe

Here's how your field employees can process payments upon project completion.

1

## JOB COMPLETION

Once a job is completed, your employee opens up our mobile app on a smartphone.

2

## USING THE APP

Using the app, your customer's payment is processed via a compatible Bluetooth card-reading device or via manual entry of payment info.

3

## CUSTOMER DELIGHT

The customer is delighted with the speed, convenience, and security of the process. Payment info is not saved beyond the transaction.

4

## PAYMENT RECEIVED

Your company is excited to receive prompt payment for service.

See how this feature can help enhance your customers' experience and improve your cash flow:
