

Form: Example Application

Do you know ...

Our **bulk pickup request forms** allow clients to request pickup for larger trash items not typically covered by regular waste collection services?

- Customers can submit digital forms to request assistance with removing bulkier items.
- Name and contact data can be required, for additional information possibly needed on the date of service.
- These forms can be set up to automatically generate a dispatched order, via integration.

Eliminate the need to accept bulk pickup requests strictly via phone call, **saving time and company resources.**
