

Industry:
Professional Service
Nonprofit Organization

A nonprofit organization providing job training and employee placement services

CHALLENGES

A nonprofit organization required stronger oversight of their field and HQ operations. They wanted a better way to streamline the dispatching of their drivers and vehicles along with the ability for their workforce to confirm loads and deliveries. They also required more detailed data about the usage of their assets and vehicles, given the investments in these resources. Digitizing these manual processes would enable their agency to conduct more accurate and efficient inventory, maintain a safer and more fuel efficient fleet, and protect their investments.

SOLUTION

With TeamWherx, the organization was able to electronically track the loading of goods and equipment onto their vehicles and provide HQ with completed deliveries to retail stores and other locations. The organization was also able to monitor their vehicles' positions in real-time. Asset tracking data enabled them to better protect their equipment and digital dispatching fostered more efficient work order scheduling.

BENEFITS

By using our platform, the organization conducted faster and more thorough inventory. They reduced shrinkage and verified that goods were safely delivered on time each day at the requested locations. Digital forms helped them save money on paper costs and also exchange critical information on the status of work orders. Fleet and asset data helped them reduce the risk of loss/theft while boosting their vehicles' fuel efficiency.

WIRELESS FORMS

Digital inventory increases efficiency.

GPS TRACKING

GPS data enhances accountability.

JOB DISPATCHING

Electronic dispatching saves time.
