

# Form: Example Application

## Do you know ...

Our **HVAC maintenance forms** help technicians conduct A/C unit inspections and document repairs performed?

- The checklist can be customized to ensure technicians complete each task.
- Additional prompts can be included to help the technician cross-sell and upsell.
- Customers can provide their signature, acknowledging job completion.

These checklists **streamline customer invoicing** and **strengthen customer satisfaction**.

The screenshot shows a mobile application interface for an HVAC Maintenance Checklist. At the top, there is a navigation bar with a back arrow, the text 'Module HVAC Maintenance Checklist', and a hamburger menu icon. Below the navigation bar, the title 'Air Conditioning / Heat Pump' is displayed. The main content area is titled 'Completed' and contains a list of tasks with checkboxes. The tasks are: 'Clean entire outdoor pad (or as much as is accessible with unit on pad)' (checked), 'Clean outdoor coil by removing the top of the unit and spraying coil cleaner from the inside' (unchecked), 'Clean all debris from inside the outdoor unit' (checked), 'Wire nuts on the control wiring are turned up to avoid holding water' (unchecked), 'Wax outdoor unit' (unchecked), 'Check and record condition of reversing valve' (unchecked), 'Ensure Schrader valves are working properly to prevent' (unchecked), 'Make sure caps are installed on service ports' (checked), 'Check all copper lines, making sure they aren't rubbing against each other' (unchecked), and 'Check and record all refrigerant pressures, line temperatures, and outside ambient temperature' (unchecked).
