

Mobile Payments

Seamless integration that helps you drive more revenue.

Accept funds from nearly anywhere with Mobile Payments, powered by Stripe. With this feature of Actsoft, revenue for goods or services can be collected directly from the field. Increase the ways your company is able to handle its billing by being able to process payments on the go.

Features:

- Use Actsoft’s mobile app to facilitate payments, work orders, and data from a single interface.
- Swipe credit or debit cards and process payments digitally via a compatible Bluetooth card-reading device.
- If no card-reading device is available, you can manually type in credit or debit card information (no customer information is saved once a payment is processed).
- Functionality with both smartphones and tablets eliminates the need to accept payments from a single place.

Disclaimer: For each transaction performed, both the third-party mobile payments provider and Actsoft accept a small transaction fee.

Benefits of Mobile Payments:

Boost Profit
Capture more revenue in the field.

Save Time
Benefit from near-instantaneous payment processing.

Enhance Versatility
Bill and accept payments on the spot.

Increase Convenience
Securely collect payments to keep your business and customers safe.
