

Example Application

Do you know ...

The **Client Custom Fields** feature allows customers to store additional client information in the custom fields they create.

- Multiple Client Custom Fields can be created.
- Once created they are available for all clients.
- Customers can manage the visibility of each field with the check box selections of “show on handset”, “show on handset order list”, “show in reports”, and “read-only on order”.

The Client Custom Fields feature makes creating and capturing additional client details simple and user friendly.
