Advisory & consulting

### Cybersecurity Advisory and Consulting

Expert cybersecurity advisory and consulting services to help organizations assess their security posture, identify vulnerabilities, and implement effective security strategies. Our experienced consultants can help you develop a comprehensive cybersecurity strategy, conduct security audits and assessments, and provide guidance on compliance with industry regulations. We also offer advisory services on emerging threats, incident response planning, and risk management.

Physical Security

Cyber-physical security solutions to protect critical infrastructure and operational technology (OT) systems. We help organizations secure industrial control systems (ICS), IoT devices, and integrate physical security systems with cybersecurity measures. By addressing the convergence of cyber and physical threats, we help organizations ensure business continuity and mitigate risks.

Security-as-a-Service & SOC

Security-as-a-Service include threat detection and response, vulnerability management, identity and access management, data privacy and compliance, and security operations center (SOC) services. By leveraging advanced technologies and expert security analysts, we help organizations mitigate risks, ensure compliance, and maintain a strong security posture.

Threat Detection & Response

Threat Detection and Response

Balihans safeguards your digital assets with advanced threat detection and response capabilities. We leverage SIEM and SOAR technologies to proactively identify, analyze, and respond to cyber threats, ensuring the security of your critical infrastructure.

Incident Response and Rapid Recovery

Balihans offers comprehensive incident response and recovery services to minimize the impact of cyberattacks. Our experts can rapidly respond to security incidents, contain the breach, and restore normal operations. We provide incident response planning, digital forensics, and post-incident analysis to help organizations learn from incidents and improve their security posture.

Vulnerability Management

We offer comprehensive vulnerability management services to identify, assess, and mitigate vulnerabilities in your IT infrastructure and applications. We conduct regular vulnerability assessments, patch management, and penetration testing to ensure the security of your systems. By proactively identifying and addressing vulnerabilities, we help you minimize the risk of cyberattacks.
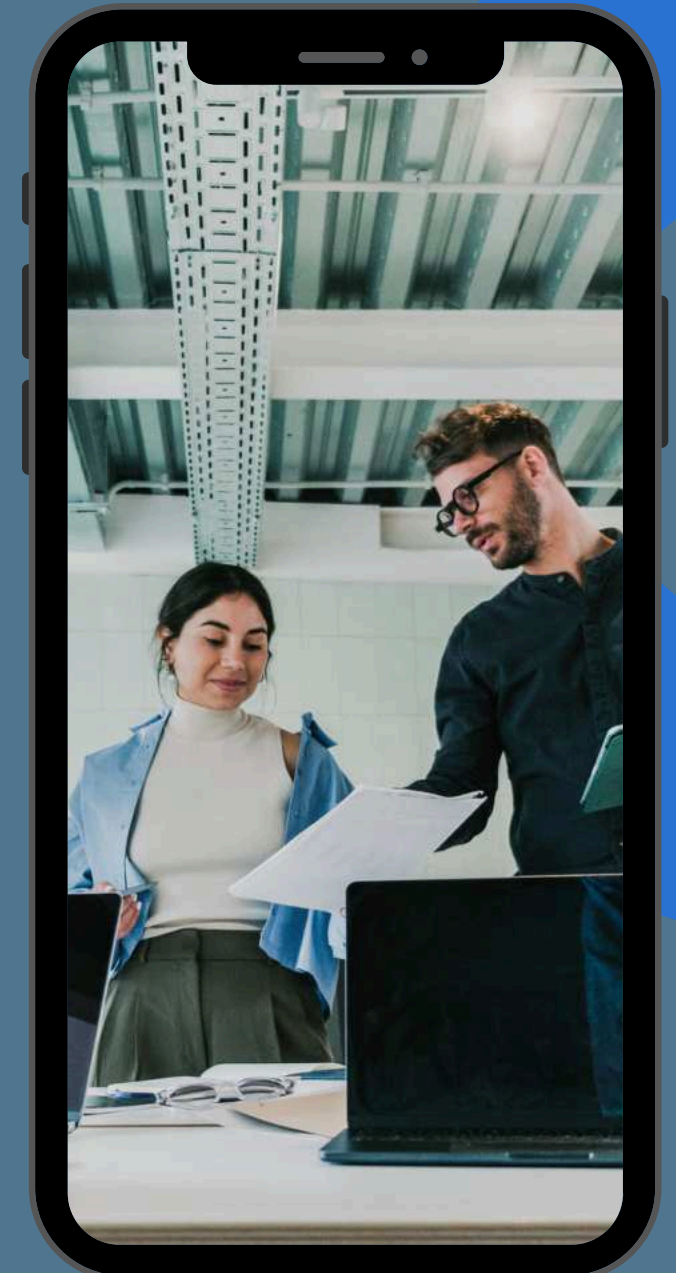

Governance, Risk, & Compliance (GRC)

Risk Assessment & Management

Balihans helps you identify, assess, and mitigate risks to your organization. We conduct comprehensive risk assessments to identify potential threats and vulnerabilities, and develop effective risk mitigation strategies. By implementing robust risk management practices, we help you protect your assets and minimize the impact of potential incidents.

Compliance Management

We help you ensure compliance with industry regulations and standards, such as GDPR, HIPAA, and PCI DSS. We conduct regular compliance audits and assessments to identify and address potential compliance gaps. By implementing robust compliance frameworks, we help you minimize the risk of regulatory fines and reputational damage.

Policy & Procedure Development

Partner with us to develop and implement effective policies and procedures to ensure compliance with industry standards and regulations. We conduct regular audits to assess your organization's security posture and mitigate risks associated with third-party vendors and suppliers.

Privacy & Data Protection
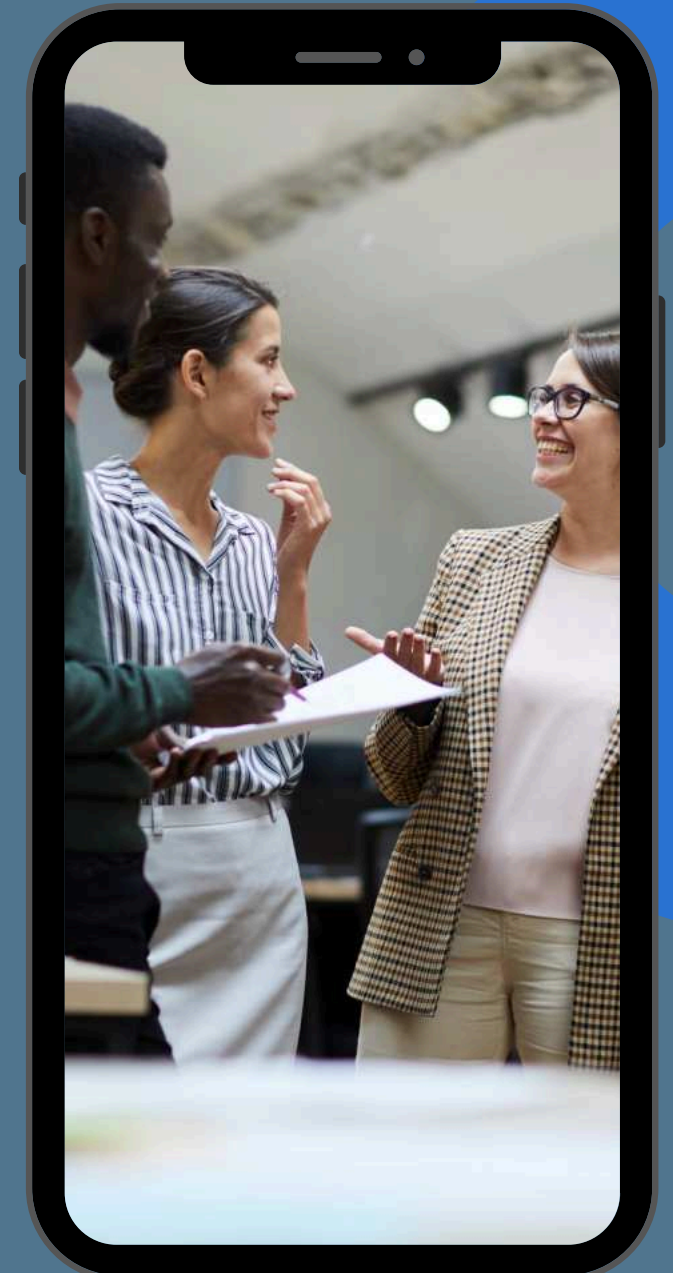

Zero Trust and Edge Security

Balihans offers comprehensive zero trust and edge security solutions to protect your organization's digital assets. We implement a zero-trust security model, secure edge devices and networks, protect IoT devices, and secure remote access to your organization's resources. By adopting a zero-trust approach and securing edge devices, organizations can significantly enhance their security posture and reduce the risk of cyberattacks.

Digital Workplace Security

We implement robust security measures to secure remote access, protect sensitive data, and mitigate cyber threats. By providing secure access, enforcing strong authentication, and monitoring user activity, we help organizations maintain a secure digital workplace.

Privacy and Data Protection

Balihans provides comprehensive data privacy and protection services to help organizations safeguard sensitive information. Our services include data privacy assessments, compliance audits, data protection training, and incident response planning. We help organizations comply with data privacy regulations such as GDPR, CCPA, and HIPAA, and protect personal data from unauthorized access and breaches.

Why Balihans

Expertise and Innovation

We are a team of highly skilled professionals with expertise in a wide range of technologies and industry best practices. We are at the forefront of innovation, constantly exploring and implementing the latest technologies to deliver cutting-edge solutions.

Global Presence

Balihans' global delivery presence empowers us to leverage a diverse talent pool and deliver exceptional service worldwide. This translates to 24/7 support, cost-effective solutions, and seamless cross-time zone collaboration, enabling us to effectively serve clients with global operations and address their unique needs.

End-to-End Partner for IT/Business Solutions

Balihans' end-to-end services capability provides a distinct advantage. Instead of managing multiple vendors, clients rely on us for a seamless and coordinated approach to all their IT and business needs, eliminating the complexities of managing multiple contracts and integrating disparate systems.

Customer-Centric Approach

We prioritize customer satisfaction and build strong, long-term relationships. We understand that every business has unique needs, and we tailor our solutions to meet specific requirements and achieve desired outcomes.

Data-Driven Solutions

We leverage data analytics and insights to deliver data-driven solutions that drive measurable results. Our focus on data-driven decision making helps our clients make informed choices and optimize their business operations.

Case Study

Elevating Security Posture with a 24/7 SOC

The Client

The financial services firm, a global leader in the industry, recognized the critical importance of cybersecurity in protecting its sensitive customer data and maintaining operational resilience.

Challenge

The financial services firm operated in a highly regulated industry, making it a prime target for cyberattacks. The increasing sophistication of cyber threats, coupled with the rapid evolution of technology, posed significant challenges to the organization's security posture. The firm's existing security measures were inadequate to address the evolving threat landscape. They required a comprehensive and proactive approach to security, including 24/7 monitoring, incident response, and threat detection. To achieve this, the firm sought a dedicated security team to bolster their defenses and ensure the confidentiality, integrity, and availability of their critical systems and data.
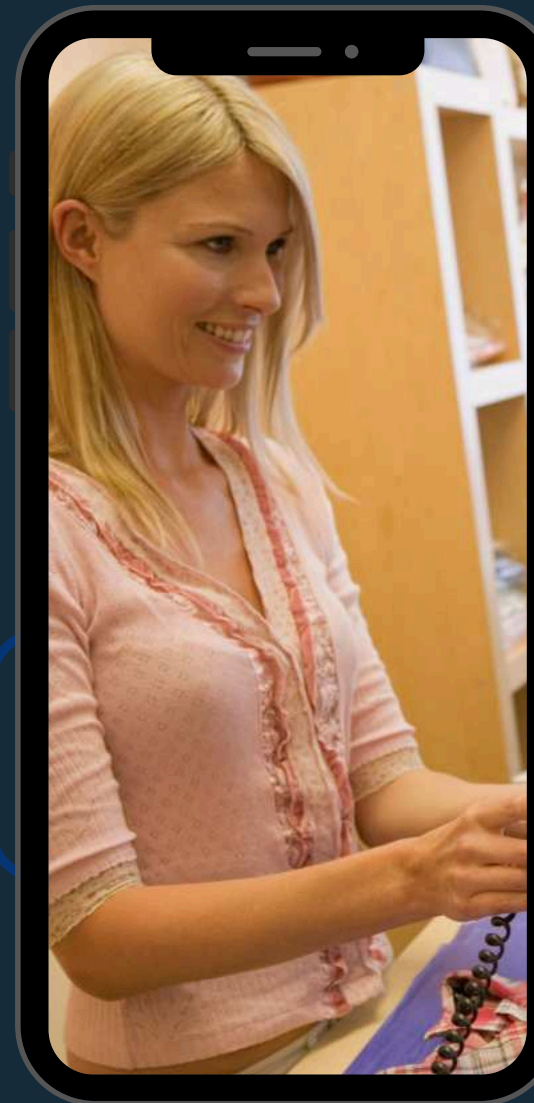

Solution

- 24/7 Security Monitoring: Continuous monitoring of network traffic, systems, and applications to detect and respond to threats.
- Threat Detection and Response: Advanced techniques to identify and mitigate cyberattacks.
- Security Incident Response: Rapid response to security incidents to minimize damage.
- Vulnerability Management: Regular assessments and patching to address weaknesses.
- Security Information and Event Management (SIEM): Centralized log management and analysis.
- Security Orchestration, Automation, and Response (SOAR): Automated incident response.

Results

- Enhanced Security Posture: Strengthened the overall security posture of the organization.
- Reduced Mean Time to Detect (MTD): Quickly identified and responded to security incidents.
- Minimized Downtime: Reduced the impact of security breaches on business operations.
- Cost-Effective Security: Optimized security operations and reduced costs.

Case Study

Ensuring NIST Compliance with Balihans: A Healthcare Organization

The Client

A healthcare organization managing sensitive patient data needed to achieve and maintain compliance with the NIST Cybersecurity Framework.
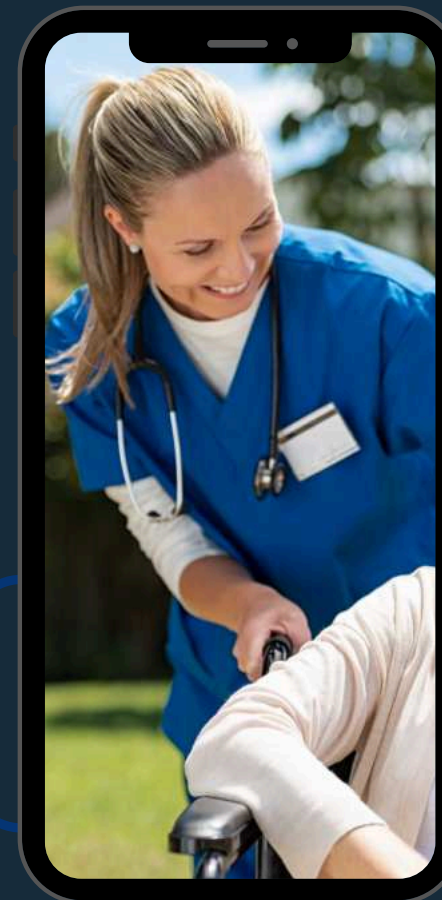

Challenge

Stringent Regulatory Requirements
The organization needed to comply with HIPAA, NIST, and other relevant healthcare regulations, requiring a robust cybersecurity framework.

Complex IT Environment
The organization's complex IT infrastructure, including legacy systems and cloud environments, made it challenging to implement consistent security controls.

Solution

NIST Framework Assessment
Conducted a thorough assessment of the organization's existing security posture against the NIST Cybersecurity Framework.

Gap Analysis and Remediation Planning
Identified gaps in compliance and developed a detailed remediation plan with prioritized actions.

Security Control Implementation
Assisted with the implementation of NIST-recommended security controls across the organization's IT infrastructure.

Results

- Achieved Compliance: Demonstrated compliance with NIST framework.
- Improved Security: NIST controls reduced high-risk vulnerabilities.
- Streamlined Reporting: Standardized processes sped up audits.
- Enhanced Data Protection: Encryption improved data confidentiality.
- Increased Awareness: Training reduced risk of human error.

Hear from our Customers

Ruth Weatherall
Co-founder, UP3 Services

Balihans designed complex solutions for us such network printing integration that seemed impossible until it was done

Lars Oxelstedt
COO, Procori SMC

We were looking to get offshore development services. The team (Balihans) fit nicely with our work culture and delivery model

Customers love us because

Focus on Results
We are committed to delivering measurable results that exceed client expectations. We work closely with our clients to understand their business goals and develop customized solutions that drive growth, improve efficiency, and enhance profitability.

Reliability & Timeliness
We have a proven track record of meeting deadlines while maintaining the highest quality standards. Customers rely on Balihans to deliver their IT solutions promptly, ensuring minimal disruption to their business operations and maximizing productivity.

Scalability & Future-Proofing
Balihans understands the evolving nature of businesses and the need for scalable IT delivery solutions. We deliver customers' deliverables with scalability in mind, allowing them to expand operations without major disruptions or costly redevelopments
